

Write a text file. Get the
PDF LinkedIn wants.

No Canva. No template picker. No AI imagery.

On LinkedIn, a carousel is a *document post*.

Documents are PDFs. A folder of square PNGs is homework, not a post.

So I stopped opening *Canva*.

Write the argument in a text file. Render it. Upload the PDF. That is the whole loop.

THE PALETTE

1

ACCENT COLOR. FOUR SWATCHES TOTAL.

THE LOOP

01 Write

A

.deck.md
you can diff in git

02 Render

Headless Chrome you already have

03 Auto-fit

Long headlines shrink instead of clipping

04 PNGs too

2160×2160 for X and Instagram

05 Upload

One PDF. LinkedIn calls it a carousel.

No icons. No illustrations.

On purpose.

The visual identity is type and hairline rules. An icon set would break it.

INSTALL

```
$ npx skills add akashp1712/skills --skill carousel-press
```

A text file in. The PDF LinkedIn wants, out.

FREE · MIT

The design is not a
picker. It is a *press*.
